

M18.3 Solution Guide - Splunk Reports

In this activity, you were tasked with creating a scheduled report and sending an email notification.

To create the scheduled report:

- Enter `source="fortinet_IPS_logs.csv" | eval DB_type = if(dest_ip == "12.130.60.5", "Customer DB", "Non-Customer DB") | top limit=20 DB_type` in the query and select Search.
- Click Save As > Report.
- Title the report "DB Server Attack Report."
- Select Save.
- On the next page, select the Schedule option.
- Check Scheduled Report.
- Schedule the report to run:
 - Every day at 12 p.m.
 - Time range of 24 hours
 - Leave all the other options the same.
- Select Add Action > Send Email.
 - Send to `management@ompcompany.biz`.
 - Set the subject to "Database Attack Report."
 - Set the message to "Your daily database attack report is now available."
 - Uncheck all the Include checkboxes.
- Click **Save**.
