

eModule 19 Day 1: Advanced Dashboards

- You've built a robust dashboard to monitor attacks against the web server.
- Several of your SOC staff members request you make the dashboard panels more interactive so they can quickly research attacks.
- Enhance your dashboard to add drilldowns and interactivity features.

Instructions

Using the same dashboard, add the following features:

1. Time-based input on all panels
2. A drilldown in the geographic map that links to new searches
