

M19.1 Solution Guide - Creating Dashboards

In this activity, you combined the visualizations you've created so far into a single dashboard.

-
1. Select the saved radial gauge from the reports list.
 - Once opened, select Add to Dashboard.
 - Select New Dashboard.
 - Title the dashboard "Website Monitoring."
 - Leave all the defaults as they are.
 - Select Save.
 2. Follow the same process for the pie chart and geographic map. For these, select Existing dashboard.
 - Select Website Monitoring from the dropdown when prompted.
 3. To create the fourth visualization:
 - Select the pie chart from the reports list.
 - Select Add to Dashboard.
 - For the Panel Content option, select Statistics.
 - Select Save.
 4. Once the dashboard is complete, select Edit.
 - Drag the statistical data view of the pie chart next to the pie chart.
