

M19.1 Solution Guide - Multiple-Value Visualization

In this activity, you designed a pie chart to illustrate multiple values.

1. Design an SPL query using similar criteria that displays the top 10 URI paths:
 - `source="radialgauge.csv" http_method=POST| top limit=10 uri_path`
2. To visualize the data, select Visualization and choose the pie chart option.
3. Save your visualization as a report titled "Pie Chart – Top 10 URI_PATH."

Bonus

To visualize the data with other methods, select Visualization and any options you like, such as:

- Bar chart
- Line chart
- Column chart
- Area chart
