

Module 21 Day 1: Interpreting IR Plans

In this activity, you will compare several incident response plans from different companies.

- This activity is meant to provide an overview of some real-world IR Plans from different companies in different sectors and industries.
- Don't be overwhelmed by the volume of these documents. Focus on each document's table of contents and select one section to compare across documents.
- Setup: View or download the documents at the following links:
 - [National Cyber Incident Response Plan](#)
 - [Carnegie Mellon Incident Response Plan](#)
 - [State of Oregon Incident Response Plan](#)
 - [Virginia Tech Incident Response Plan](#)

Instructions

- Write down the type of institution or industry that each of these IR plans belong to.
- Compare the table of contents for each document:
 - Which sections do most of the documents have in common?
 - Which sections are less universal across all plans?
 - What did you find interesting or potentially useful and why?
- Pick one of the sections that each of the plans had in common. Review the content across each of the plans.
- Prepare a short summary of the section and include the following information:
 - What content is found in the section?
 - What value would the section provide during an incident?
 - Who is the primary audience for the section?
