

Module 21 Day 2: Digital Forensics in the Cloud

Activity Introduction

- In this activity, you will look at a case concerning a DoS attack that occurred on an online shopping website.
- You will list at least four challenges associated with conducting a cloud forensics investigation.
- You will also research how these challenges affect the chain of custody during a digital forensics investigation.
- As a bonus, you will be asked to provide at least one example of how evidence can be obtained to validate the chain of custody in cloud-based forensic investigations.

Instructions

1. Read the following article:
 - ["Cloud Forensics: Trends and Challenges," International Journal of Engineering Research & Technology, 2020.](#)
2. List at least four challenges associated with conducting a cloud forensics investigation.
3. Using the following resource for additional research, explain how these challenges affect the chain of custody.
 - ["Analysis of Cloud Forensics: Review and Impact on Digital Forensics Aspects," International Journal of Scientific Research in Science and Technology, 2021.](#)

Bonus

- Provide at least one example of an existing solution used to address challenges present in cloud forensics cases.
 - Use the following PDF for your research:
 - ["Cloud and Edge Computing-Based Computer Forensics: Challenges and Open Problems." Electronics, 2021.](#)
