

Module 21 Day 3: Mobile Evidence Analysis

Activity Introduction

- In this activity, you will analyze evidence and create a spreadsheet that profiles the details of Peter's iPhone.
- This will serve as your preliminary documentation for the remaining activities.
- To complete this task, you will need to use Autopsy's File Search by Attributes and Keyword Search functions.
- You've received a list of relevant directories. Use this document to help guide your research:
 - [iPhone Forensic Image: Important Databases and Files](#)
- Document your findings in the following worksheet:
 - [iPhone Details Worksheet](#)
 - You will need to make a copy to edit this file.

Instructions

1. Launch Autopsy by double-clicking the icon on the desktop.
2. Open the existing case created by the junior investigator:
 - Case name: Pure Gold Credit Union Case
3. Document the following information from the junior investigator:
 - MD5 and SHA-256 hashes of the iPhone disk image have been provided by the junior investigator:
 - MD5 hash: 34c4888f095dc3241330462923f6fea5
 - SHA-256 hash:
71aed05a86a753dec4ef4033ed7f52d6577ccb534ca0d1e83ffd27683e621607
 - Device information:
 - Device model
 - If Autopsy is not able to identify the version of the iPhone, which two does Autopsy think it could be?
 - Device host name

- Hint: Look for \Accountnames, which indicates the device name.
- OS version #
 - Hint: Look for the letter v and a number which indicates the version.
- Device serial #
- Integrated Circuit Card ID (ICCID) number
- International Mobile Equipment Identification (IMEI) number
- Peter's information:
 - Peter's phone number
 - Peter's email addresses

Document all the required information in the iPhone Details Worksheet.

Bonus

- Research the two types of IDs below and identify how they are used to identify mobile devices:
 - IMEI number
 - ICCID
