

Module 21 Day 4: Peter's SMS Messages

Activity Introduction

- In this activity, you will continue to work with your group as a digital forensics team.
- You will examine Peter's SMS messages and correlate phone numbers with co-conspirators.

Instructions

1. Use keyword search to find `sms.db`.
2. Add a custom tag called `sms`.
3. View the messages in the Data Content pane.
4. Analyze the SMS messages and answer the following questions:
 - Are there any suspicious SMS communications that could implicate Peter or Rosie?
 - Were the text messages between Peter and Rosie sent as SMS or iMessage?
 - How do you know?
5. Update your Correspondence Evidence Worksheet with any additional evidence relevant to the case.
