

Module 1 Day 2: Activity 02 The Stolen iPhone

Activity Introduction

In this activity, you will determine several malicious acts an attacker could do with a stolen iPhone.

- You just found an unattended iPhone left at the table in a restaurant.
- The iPhone is not locked with a password, and every feature and app is accessible.
- In groups, develop a list of 5–10 ways that a malicious actor could maliciously use this iPhone.

Hints

- Think creatively.
- Note that not all malicious acts are technical.

As always, be prepared to share your answers!
