

Activity File: Creating Domain OUs, Users, and Groups

In this activity, you are tasked with setting up users, groups, and organizational units for your domain.

- In this scenario, your company needs you to set up the domain accounts for the people who will be using the Windows workstations.
- You will need to set up two users: **Andrew** and **Bob**. Andrew is in the development department and Bob is in the sales department.

Instructions

Complete the following tasks using the Active Directory Users and Computers (ADUC) tool:

1. Create a top-level **GC Users** organizational unit for each department's users.
 - Create a **Sales** sub-OU.
 - Create a **Development** sub-OU.
2. Create a user, **Bob**, in the **Sales** OU.
 - Set their password to **Ilovesales!**.
3. Create a group, **Sales**, within the **Sales** OU.
 - Add user, **Bob**, to the group **Sales**.
4. Create a user, **Andrew**, in the **Development** OU.
 - Set their password to **Ilovedev!**.
5. Create a group, **Development**, within the **Development** OU.
 - Add user, **Andrew**, to the group **Development**.

6. Move the Windows 10 machine in the existing default **Computers** directory to a new **GC Computers** OU.
 - Create a **GC Computers** OU. It should be on the same level as **GC Users**.
