

Module 8 Day 3 : Analyzing ARP

Activity File: Analyze ARP

In this activity, you will play the role of a security analyst at Acme Corp.

- CompuCom, a software company, hires Acme Corp to do a security assessment of its network.
- Your task is to analyze ARP activity from a CompuCom packet capture to determine if any vulnerabilities exist.

Instructions

1. Open the packet capture provided below and filter out for ARP activity.
[ARP Packet Capture](#)
2. Document the physical addresses found for each of the following IP addresses:
 - 192.168.47.1
 - 192.168.47.2
 - 192.168.47.200
 - 192.168.47.254
3. Further analyze the packet capture to determine if these IPs present any potential security vulnerabilities, and write a summary of your findings to provide to CompuCorp.

Bonus

1. Name a few ways to protect against this vulnerability.
2. Determine the primary vendor for the MAC addresses.
