

Module 8 Day 3 : Enumeration with ping

Activity File: Enumeration with ping

- In this activity, you will play the role of security analysts at Acme Corp.
- CompuCom, a software company, hires Acme Corp to do a security assessment of its network.
- CompuCom has provided a list of its host IP addresses. Your task is to use `ping` to determine which hosts are accepting connections.
- Important: Be sure to conduct this activity on your local machine and not the web lab!

Instructions

1. Use `ping` to determine which of the following IP addresses are accepting or rejecting connections.
 - 192.0.43.10
 - 107.191.96.26
 - 41.19.96.234
 - 107.191.101.180
 - 23.226.229.4
 - 154.226.18.4
 - 176.56.238.3
 - 176.56.238.99

Bonus

1. Write a short summary of your findings to provide to CompuCom.
