

Module 7 Day 4: Activity Applying Patches

Narrative:

Keeping a Windows 10 system up-to-date is one of the most effective ways to protect it from vulnerabilities and improve overall performance. This lab will walk you through the process of ensuring your system is configured to receive and apply updates effectively. By the end of this activity, you will have a clear understanding of how Windows Update works, how to troubleshoot common update issues, and how to document the process for future use.

This activity is run from your Windows 10 virtual machine.

Instructions:

1. **Access Windows Update Settings:**
 - Open the **Settings** app by pressing **Win + I**.
 - Navigate to **Update & Security > Windows Update**.
2. **Check for Pending Updates:**
 - Click on **Check for updates**.
 - Note any pending updates, including feature and security updates.
 - Document the update names, their size, and any available details.
3. **Configure Automatic Updates:**
 - Click on **Advanced options** in the Windows Update section.
 - Ensure the setting for **Receive updates for other Microsoft products when you update Windows** is enabled.
 - Under **Choose how updates are installed**, ensure **Automatic (recommended)** is selected.
 - Define active hours to prevent updates from disrupting your work. Click on **Change active hours** and set a range of hours when the system should not automatically restart.
4. **Install Pending Updates:**
 - Allow the system to download and install updates.
 - Monitor the progress and note any errors or interruptions.
 - Restart the system if prompted, ensuring all updates are fully applied.

5. Verify Update Success:

- After the restart, return to the Windows Update settings to confirm all updates have been installed.
- Click on **View update history** and document the successfully installed updates.

6. Troubleshoot Issues:

- If updates fail, use the **Troubleshoot** option under **Windows Update** to identify and resolve problems.
- Document the troubleshooting steps and results.

7. Submit Your Findings:

- Write a short summary of the process, including:
 - Updates that were installed.
 - Any challenges faced and how they were resolved.
 - The configured settings for automatic updates.
