

Cybersecurity

Scripting your Linux Auditing and Hardening tasks

Lesson 10.3

Welcome

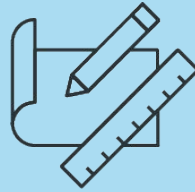

Learning Objectives

Today's lesson will cover:

1 A brief overview of project tasks for Day 3.

2 Overview of deliverables for Project 1.

2 Project work.

Day 3 **Project Overview**

Day 3 Project Tasks

Steps you will be working on today:

- Scripting your hardening tasks
- Scheduling your hardening scripts
- Completing the summary report

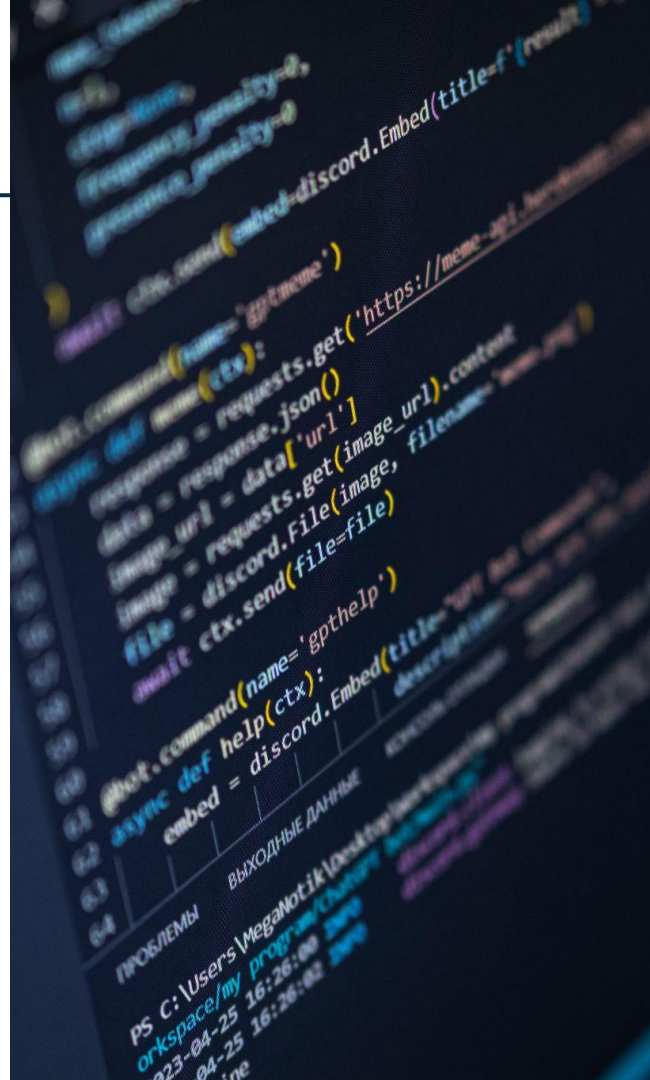

Day 3 Project Tasks

Scripting your hardening tasks

You will build out **two scripts** to automate many of the tasks you have completed.

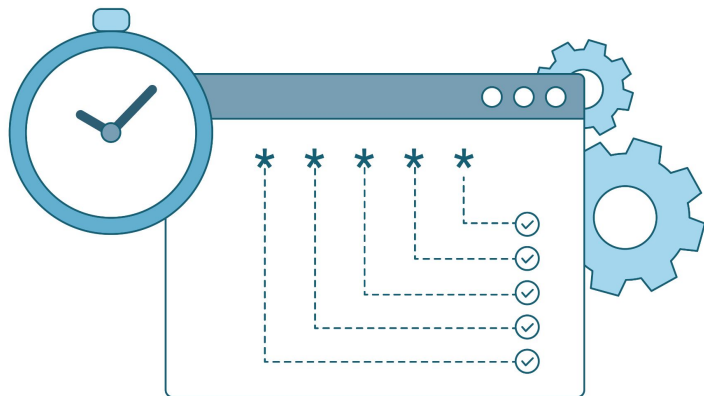

Ensure to test your scripts and confirm there are no errors.

Day 3 Project Tasks

Scheduling your hardening scripts

After you have designed your scripts, Part 2 will have you schedule the two different scripts with `cron` jobs.

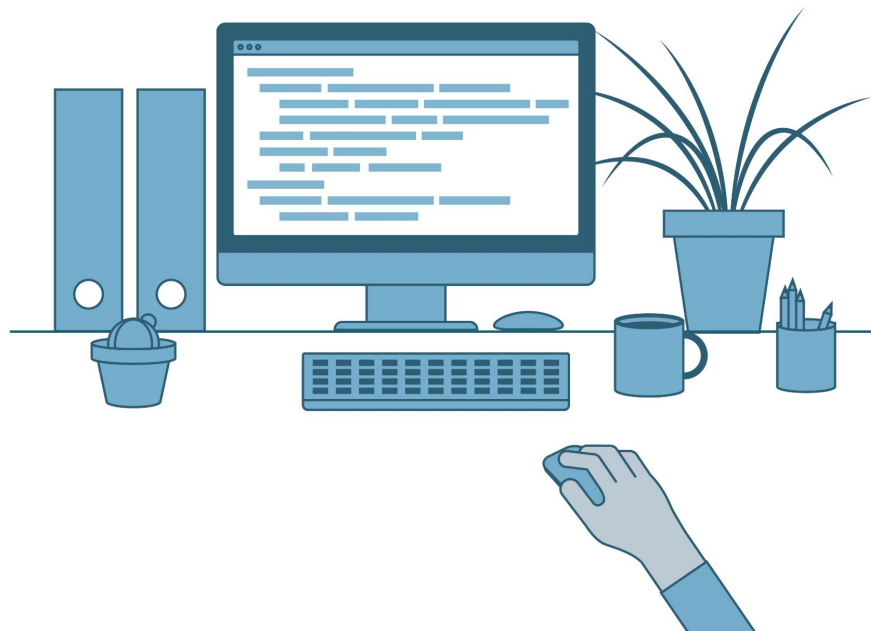

Day 3 Project Tasks

Completing the summary report

For the last activity, you will be tasked with completing your summary report. In your report, include:

- Tasks that have been checked off
- All commands built

Questions?

Activity

Hardening your Linux server

For the remainder of today's class, you will work on completing Day 3 project tasks.

- While you are responsible for completing your own project, you can ask classmates, the TA, or the instructor to assist if you have any questions.
- **Remember** to complete the checklist document as you progress through the activities.

Suggested Time
Remainder of class

Time's Up!
