

Module 18 Day 3: Splunk Reports

Activity Instructions

- Your manager appreciates your work on building a statistical report with SPL to identify attacks against your sensitive customer database server.
- You are now tasked with scheduling this statistical report so OMP management can review the current state of the attacks against this server.

Instructions

Using the SPL from the previous activity, design a scheduled report with the following criteria:

- Runs every day at 12 p.m. and pulls the last 24 hours of data
- Sends an email to your manager at management@ompcompany.biz
- Sets the subject of the email as "Database Attack Report"
- Contains a message in the email body stating that the daily database attack report is now available
