

## Module 23 Day 1

### Activity File: Advanced and Specialized Certifications

- In this activity, you will research several advanced and specialized certifications.
- You will select an information security domain that you are interested in and then determine its relevant certifications.
- You'll add your findings to the spreadsheet you worked on in the previous activity.
- Feel free to share your findings with fellow students who share similar interests.

### Instructions

Continue using the spreadsheet you started filling out in the previous activity.

#### Step 1: Select Advanced Certification

- Visit the following site and scroll down to List of certifications: Vendor-neutral:
  - [Wikipedia: List of InfoSec Certifications](#)
- Select the following:
  - One certification focused on general cybersecurity
  - One certification focused on management
- Select a focus or domain you are interested in, such as:
  - Cloud
  - Healthcare
  - Auditing
  - Forensics
  - Penetration testing
  - Threat intelligence
  - Privacy
  - Software/application security
- Select two or three certifications related to your focus.

#### Step 3: Add Findings to Spreadsheet

- Complete the sheet titled Advanced Certs in the [spreadsheet](#) provided in the last activity.
  - You can find the sheet name on the tab at the bottom left of the Google Sheets window.

- Use online resources to conduct research and complete the spreadsheet.
  - Be ready to share your findings with the class.
    - In particular, you might consider sharing what you found with other students who have similar interests so that they can add your findings to their spreadsheets.
-
