

Module 23 Day 1

Activity File: Certifications and Careers

- In this activity, you will use job search websites to research InfoSec careers and certifications.
- You must find five InfoSec positions and note the certifications that are desired or required for each.
- Add your findings to the spreadsheet provided.

Instructions

Use the following spreadsheet to document your findings:

- [Certifications and Careers Spreadsheet](#)
- Note: You will need to make a copy of the document.

Step 1: Search Job Listings

- Access either of the following job search websites:
 - www.dice.com
 - www.indeed.com
- Search "information security certification" in your area or the closest largest city.
- From the results, select five InfoSec positions.

Step 2: Evaluate Certification Requirements

- View the details of each position and look for mentions of required or desired certifications.
- Use the following webpage or other online resources to find information about unfamiliar certifications:
 - [Wikipedia: List of Computer Security Certifications](#)
- Add your findings to the Certifications and Careers spreadsheet.
- Keep your copy of this spreadsheet open. You will continue to use it in the next activity.

Be prepared to share your findings with the class.
