

Module 23 Day 2

Activity File: Behavioral Interviews

- In this activity, you and a partner will practice answering the "tell me about yourself" question.
- Be sure to provide constructive feedback on one another's answers.

Instructions

1. Take some time to write down your answer to the common interview prompt "Tell me about yourself."

Consider the following questions when structuring your response:

- What was your past work experience like, and what accomplishments did you achieve in these positions?
 - Why are you interested in this position and the cybersecurity industry?
 - What are your future career aspirations, and what can you bring to this position?
2. Remember, your answer shouldn't be longer than a few minutes.
 3. When you and a partner have your answers ready, take turns presenting them.
 4. Provide constructive feedback to your partner, considering factors such as:
 - Was the answer expressed briefly and clearly?
 - Did the answer show passion for cybersecurity?
 - Did the answer illustrate what your partner will bring to the position?
 - Was the answer clear, and did it cover your partner's past experience, present pursuits, and future aspirations?

Keep this answer handy and continue to workshop it as you prepare for job interviews.
