

Module 18 Day 2: Uploading Data into Splunk Activity

Activity Instructions

1. As the recently hired SOC manager at OMP, your first task after setting up Splunk is to upload data into your Splunk repository.
2. You have been provided several log files to upload, which will later be used to detect security events.

Instructions

Upload the three log files `nessus.txt`, `carbon_black.txt`, and `win_security_events.txt`

```
- unzip the `logs.zip` file located in the  
`/splunk/logs/Week-1-Day-2-Logs/` directory
```

1. Use the Splunk data upload feature to load the log files.
2. Give each file the same name as the log file.
 - No description is required.
3. Provide a brief summary of the contents of each log file as and what they monitor.
 - Hint: Use Google to help with your research.
