

Module 8 Day 3 : Analyze a SYN scan

Activity File: Analyze a SYN Scan

In this activity, you will continue to play the role of a security analyst at Acme Corp.

- CompuCom requests that you analyze a packet capture of a SYN scan it ran against one of its hosts.
- You must determine what ports are open, closed, and filtered.

Instructions

1. Open the packet capture provided to you.
 - [SYN Scan Packet Capture](#)
2. Based on the host responses, determine which ports are open, closed, or filtered.
3. Write a short summary of your findings.
 - Note: A general summary of the filtered ports is fine, as the list of filtered ports is large.
