

Module 11 Day 3: Cryptography

Activity File: SSL Certificates

You will continue your role as a security analyst working for the Hill Valley Police Department.

- Several of your fellow officers have received a suspicious email saying that their Hill Valley Police website account has expired and asking them to log into update their account.
- One suspicious detail is that the website linked in the email is hillvalleypd.org, but the website that officers usually access is hillvalleypd.com.
- Captain Strickland has tasked you with investigating the suspicious website and checking the certificates to determine if the website is legitimate.

Instructions

1. Access the [website that was sent to several Hill Valley officers](#).
2. Click on the purple icons on each page to view the SSL certificate information.
 - Note: Clicking the purple house on each page will take you back to the homepage.
3. Answer the following questions:
 - What is the root certificate for this website?
 - What is the intermediate certificate for this website?
 - Why is the browser giving a warning about the certificate?
4. Provide a summary of your findings and recommend what should be communicated to all the Hill Valley PD staff.
