SUMMARY

Cybersecurity Analyst with 5+ years of experience in System Administration and Networking. Bachelor's degree in Information Systems and a certificate in Cybersecurity from Georgia Tech. Currently pursuing CompTIA Security+ certification. An effective problem solver who brings both technical aptitude and an understanding of business processes. Motivated by collaboration, innovation, and cross-team knowledge-sharing to ensure compliance with security best practices.

CERTIFICATION

CompTIA Security+ (in progress)

June 2023

TECHNICAL SKILLS

Bash, C++, Python, SQL, Microsoft Office 365, Google Cloud, Virtual Machines (VMWare Workstation), Windows, Kali Linux, Ubuntu, Wireshark, Shell Script, Splunk, Burp Suite, Autopsy, AS400, Citrix, VPN, Firewalls and Windows server

PROJECTS

Code Yellow

- **Role:** Determined company website vulnerabilities and provided recommendations on securing the website and removing vulnerabilities.
- **Impact:** Identified recent attack, including when and how it was made and how long it lasted. Discovered tools used by attackers and passwords that were compromised.
- **Project Summary:** [LINK HERE](#) (PDF report or slide share)

Penetration Testing Project: Attack Strategy (Raven Security VM)

- Collaborated with a team to investigate the VM provided by Raven Security. Discovered three major vulnerabilities (weak SSH login passwords allowed access to the server, improper configuration of port 80, and default WordPress root user login information). Able to exploit the web server by attacking the machine and accessing the company's valuable data. Recommended a patch for each vulnerability exploited in the web server, SSH, and network.
- Summarized the vulnerabilities found, steps of how they are exploited, and which patches are recommended in the Penetration Testing Report: [\[Link to PDF report\]](#)

EXPERIENCE

System Administrator

May 2018 - Present

Enhance IT

Atlanta, GA

- Daily system monitoring. Verify integrity/availability of all hardware, server resources, schedule job completion, backups, and key processes while reviewing system and application logs.
- Responsible for periodic on-call rotation for after-hours support.
- Monitor security through access controls, backups, and firewalls.
- Ensure systems are kept in the required configuration profile, including patch maintenance, system backup, changes as required by evolution of production environments, and updating software and software configurations.

EDUCATION

Cybersecurity Certificate: Georgia Tech, Atlanta, GA

2023

An intensive 24-week long boot camp dedicated to Cybersecurity. Skills learned include Wireshark, Kali Linux, Metasploit, Burp Suite and training towards Security+, Network+, and CISSP.

Bachelor of Science, Information Systems: Georgia Tech, Atlanta, GA

2020
